

HEALTH AND SAFETY POLICY

At Residence ANA, we ensure a safe working environment and take care of the health of our employees and guests.

We, members of the family, take care of our own safety and health, as well as of the safety and health of our guests. Upon arrival, our guests are warned about the correct use of larger household appliances and the cleanliness of the pool.

Our guests are staying in a safe and clean environment. They are made familiar with the fire order and evacuation route. They are insured for accidents. We have fire extinguishers and instructions for handling in case of fire in the apartments and outside.

In the COVID-19 epidemic, we pay all the necessary attention to health and safety. We follow the recommendations of the National Institute of Public Health and other competent institutions.
