

## LOCAL COMMUNITY COOPERATION POLICY

At Residence ANA, we are aware that our activities are closely connected with the local community. We therefore take into account, and respect the needs and rights of the local community and local population.

We commit ourselves to:

- strengthening cooperation with local entrepreneurs, growers, suppliers and residents;
- organising a public consultation when making decisions that have implications for the whole local community;
- providing the local population with unrestricted access to all resources;
- employing staff from the local environment in accordance with our capabilities;
- encouraging guests to protect the local community, preserve it and behave responsibly.

We favour local suppliers of vegetables and other produce from surrounding farms. We are going to do our best to encourage guests to supply themselves at nearby farms.
